

ACKNOWLEDGEMENT

We would like to express our deepest gratitude to all the people who inspired us in finishing this study of System Analysis and Design proposal. Without these important persons, we could not make it up to the last.

- Our adviser, Mr. Dan Michael A. Cortez, who we believe, did everything in his capability to guide us all-throughout. Who, despite of all the things that he has to do, still allots a portion of his time to mentor and guide us.
- To Engr. Erwin D. Marcelo, for giving us this system proposal in time that we are at the verge of losing hope and for giving ideas on our statement of problems. He, also gave ample time to guide us by consulting this study.
- Our classmates, especially Wendy's Burger Group whom we've been with through ups and downs, through thick and thin. For their never ending encouragement every time that we feel like giving up.
- To the staffs of the College of Medicine who allotted us their time and effort in providing us the information that we needed throughout our study. We would like to particularly thank Dr. Angeline Alabastro, Dean of College of Medicine, who tirelessly provided and explained to us the specifics of their current system.
- To Jojo Casidsid, for being a good host for letting our group stay at their beloved house even if he's not part of our group, for giving everything he can offer and for being our runner on every defense.

And above all, to Almighty God, for providing wisdom and knowledge to each one of us, for creating a way even if it seems there is no way. We specially dedicate everything we did in this study to His glory and name. Without Him, none of this would be possible. Through Him, we declare victory!
